Axcess1

NEW RELEASE NOVEMBER 2026

AXCESS1 AI 3.0

THE FUTURE OF INTELLIGENT REDACTION IS HERE.

Canadian sovereign AI. Extraordinary document intelligence. Complete information control.

REVOLUTIONARY TECHNOLOGY

Your organization. Your rules. Your AI.

Intelligent multi-engine redaction

A language model, entity recognition, context analysis and the rules of your Act work as one. Every proposal arrives with its confidence, its reason and its clause.

Next-generation document understanding

Scans, photocopies, tables, forms, e-mails and attachments, in English and French, read and understood. Audio and video too: faces, plates, spoken names.

Intelligence adapted to you

In two weeks, the AI learns your forms, terminology and redaction practice as rules your administrator approves. Nothing learned for you serves anyone else.

Permanent, verifiable, human-controlled

Your officers decide every redaction. What is redacted is removed for good, and an independent check blocks any release where it could still be read.

CANADIAN AI SOVEREIGNTY

BUILT IN CANADA. POWERED BY PRIVATE AI.

Every client we host runs its AI on our own servers in Canada, on the latest, most powerful professional AI hardware, including NVIDIA RTX PRO 6000 Blackwell Max-Q, dedicated to Axcess1. No public AI service. No per-token bills. Your documents, your infrastructure choices, your sovereign AI.

THE POWER OF ADVANCED AI. UNDER YOUR CONTROL.

Blackwell
Latest NVIDIA AI architecture: RTX PRO 6000 Blackwell Max-Q

0
public AI services required

0 $
per-token fees

Canada
hosted here or on your servers

100% Canadian-developed · Hosted in Canada or on your servers · Bilingual EN/FR · Federal, provincial and municipal Acts

ENTERPRISE PLATFORM

ONE PLATFORM. EVERY STEP OF THE ATIP PROCESS.

Intake → **Analysis** → Review → **Redaction** → Approval → Release

From document to disclosure: many documents analyzed in parallel, a clickable workflow for every request, and a clean bilingual interface built for the officer who does the work.
