Built around your law

Many case-management products ask a public body to adapt its process to the software. Axcess1 is configured around the legislation, the procedures, the vocabulary and the reporting obligations of each jurisdiction. An organization chooses its Act once; every screen, deadline, letter and report then follows it.

Generic case management

The organization adapts to the software.

Axcess1

The software follows the legislation and the way government works.

Step	What Axcess1 does
Receive and validate	The request is entered with its type, requester and date received; a number is issued from your own numbering pattern.
Calculate the deadline	The due date follows the Act: 30 days (s. 9(1)). Holds and extensions move it and are recorded.
Assign and search	The request is assigned to an officer; the units holding records are tasked and their answers tracked.
Collect and review	Records are uploaded (PDF, Office files, scans with text recognition) and reviewed page by page.
Apply the provisions and redact	The analyst marks a passage and picks the provision of this Act; the released copy shows the section relied on.
Consult	Consultation packages are produced per party, with their due dates.
Approve	The response goes to the approver's inbox for review and signature.
Release	The release package and the decision letter are generated from the request.
Report	Requests, processing times, decisions and provisions invoked are counted for the period you choose.

Audio and video, redacted and checked

- **Picture and sound together:** blur or black out part of the picture and mute or bleep what is said at the same moment, each redaction tied to the provision of your Act.
- **Faces, licence plates, screens and text found for you:** detection runs on the server that runs Axcess1 (yours, or ours in Canada), with no outside AI service, and follows each one as it moves. An authorized official accepts or rejects every find.
- **Checked before release:** each redacted copy is compared with the original, box by box and passage by passage, and a copy that fails is not released. Location, author and device details are removed; the original is never changed.

Migration, deployment and security

- **Migration:** case history, requesters and documents are brought over from the system you use today.
- **Deployment:** hosted by SoftSim in Canada, on your own private cloud or servers, or standalone on a PC or Mac.
- **Security:** SoftSim is cleared by the Government of Canada at the Top Secret level. Each organization's records are separate, access is controlled by role and every action is recorded.
